

Optimiza and SAS host a GRC Event in Jordan

In corporation with SAS, Optimiza hosted a Governance, Risk and Compliance (GRC) Event in Jordan which was held on Oct 25, 2010. The event targeted the financial and banking sectors in Jordan, and discussed standards that control Governance, Risk and Compliance within bank operations.

Optimiza and SAS hold this event in the context of demonstrating GRC as a major issue facing organizations across most industry sectors and presenting the means to define and deploy the most effective Risk Management strategies along complete enterprise operations.

It is worth mentioning that Optimiza is considered one of the major IT companies to deploy a complete Risk Management solutions in Jordan, through its successful implementation of the Offsite Supervision System for the Central Bank of Jordan (CBJ) this year. This system aims at automating procedures that take place at CBJ to collect, aggregate, and consolidate bank and client information leading to identifying risks that threaten the banking sector in Jordan in order to take serious actions that prevent bank operations and the national economy.
