**AMAN Insurance Management Solution: The Egyptian Saudi Insurance Home (ESIH), (Egypt)**

Egyptian Saudi Insurance Home (ESIH) is a leading provider of Shari'a compliant (Takaful) insurance solutions in Egypt. It was recently established with a mission to provide the most competitive and first-rate Takaful services in Egypt.

To be able to provide this kind of service to their clients, ESIH realized that their insurance life cycle required upgrading and automation, through a comprehensive and fully integrated insurance package that would process all its insurance activities.

In 2007, Optimiza successfully custom-tailored and implemented the Optimiza's **AMAN** Insurance Management Solution – one of Optimiza's original IP solutions for ESIH.

**AMAN** successfully automated all of ESIH's manual operations, including general, medical and TPA insurance. ESIH not only uses **AMAN** to automate the full insurance cycle but also benefits from its simplified processes, increased and improved productivity and an ensured, high level of security. Today, more than 40 ESIH employees use **AMAN** in their daily operations.
